PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/718,578	Applicant(s) MORRIS ET AL.	
	Examiner Mathieu D. Vargot	Art Unit 1732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1. Given that the previous rejection contained new grounds of rejection, the prosecution of the case has been reopened. However, this action is being made final.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Volk in view of the admitted prior art as disclosed at paragraphs 8, 9 and 38 of the instant specification and Reshef et al (see col. 2, lines 57-60) for reasons of record noting the following. Applicant submits that Volk does not disclose cutting the back surface of the lens. However, such can be found at column 7, lines 58-62; column 9, lines 64+; and column 10, lines 26-29. The grinding of the back surface taught in Volk is submitted to include the instant "cutting". For the record, the paragraphs noted in the instant specification were obtained from the PGPub. Paragraphs 0008 and 0009 correspond to page 2, line 21 through page 3, line 10 of the instant specification. Paragraph 0038, teaching instant claim 7, is at page 10, lines 3-12.

3. Applicant's arguments filed June 21, 2007 have been fully considered but they are not persuasive. Applicant submits that it would not have been obvious to modify the method of Volk by making a lens with the instant radius of curvature or hollow depth. Such is simply not agreed with. The depth of Volk is around 6 mm and to increase this to 8 mm or so surely would have been obvious. While the radius of curvature of Volk is determined to be around 90-100 mm as noted by applicant, it is submitted that the

instant radius of curvature is well known in the art and that one of ordinary skill would have modified the method of Volk to arrive at such desiring a lens with that curvature. While the instant lenses may not be in common use, there is nothing of record to indicate any problems concerning the molding thereof or that such would necessarily be problematic. Hence, it is maintained that the exact radius of curvature of the lens would have been within the skill level of the art. Again, the instant cutting of the back surface is submitted to be taught in Volk, as is the molding thereof—the lens is initially molded.

4.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

5.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mathieu D. Vargot whose telephone number is 571 272-1211. The examiner can normally be reached on Mon-Fri from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson, can be reached on 571 272-1176. The fax phone
